About Academy

Academy, a sister company of Academic Work, offers intensive training programs based on the Accelerated Learning method in industries experiencing a major skills shortage. Our aim is to prepare and train people with the right skills and ambition to take on new challenges and embark upon new careers.

Academy combines a recruitment process that emphasizes candidates' personal qualities with tailored training packages that have been developed with some of the best teachers in their respective fields. Academy is based in Stockholm and has successfully trained over 2 500 consultants since it was established in 2015.

You can find more information by visiting our website: www.academy.se

Raisa has several years of experience in pharmaceutical manufacturing and knows deviation investigations, teamwork and leadership. In 2017 she decided to take a new direction in her career. In 2020 she earned a Bachelor of Science degree in Informatics, with a specialization in interaction design from Linnaeus University in Sweden. There she came in contact with programming and has continued her curiosity in the field.

Raisa is a person who is driven by personal growth and by challenges. Finding an area where she can take her wealth of knowledge and use it in a completely new way gives her the energy and motivation to push herself and others forward. She is a team player and she thinks it's important to support her team and its growth. A tight team is a great team!

Raisa chose the JAVA program because she had a dream to be able to build programs with others and put her knowledge into creating in a way that was new to her.

Problem-solving ability (GMA)

To succeed in the AW Academy Program and in the role as an IT consultant a high degree of problem-solving ability is required, to quickly take in new information and to utilize it in working contexts that are untested for the consultant.

Competencies

Except problem-solving ability, we are focusing on cooperation, flexibility and business-oriented ability, which the consultant shows high skills in.

Accelerated learning

AW Academy, a part of Academic Work

Java | Winter22

Raisa has completed Academy's Accelerated learning Program in Java. Accelerated learning is a fast way to a new career for ambitious and driven individuals with the right skills to acquire new knowledge. The education method focuses on high-speed blended learning with a lot of practical work, agile teamwork, and continuous feedback dialogue. The education is always based on specific tasks relevant to the professional role. This makes the learning process extremely efficient, and consultants can contribute as junior IT-consultants from the first day after training.

Skills

Java	Object oriented programming	Spring Boot
Databases	JavaScript	React
GIT	HTML	Devops
User Experience Design (UX)	RESTful Web Services	CSS
Agile Project Methodology	MVC

Projects & Assignments

Product security

AstraZeneca | Jun 2018 – Aug 2018

AstraZeneca needed to rebuild production lines for Product Security: Raisa developed and updated production documentation for the requirements for product security based on production tests and GMP requirements. Product security was a market requirement for continued manufacturing.

Deviation investigator/coordinator

AstraZeneca | April 2017 – Jun 2017

Raisa was involved in several projects during her time at AstraZeneca, where her knowledge of deviation management and production manufacturing was put to good use. In one project she and her team developed a new role. An improvement initiative to streamline manufacturing and the role of manufacturing technicians. The goal was to create a structure around deviations and complaints, and also follow-ups and standardizations of the deviation process. This is with great success. Today, the PET has several deviation investigators/coordinators who investigate and improve production deviations and processes.

Previous Work Experience

Marketing manager Finland

Invite Europe AB | April 2022 – Nov 2022

Raisa joined Invite Europe to manage their affairs with the Finnish market. Raisa had the main responsibility for all contact with customers, suppliers, contracts, IT issues, trend reporting, marketing and design of marketing materials for the Finnish market. Also contacts with Swedish and foreign suppliers and factories as well as financial administration.

Raisa implemented a series of improvements like handling of returns, invoice administration and ordering procedures for the Finnish market.

Production Administrator

AstraZeneca AB | Jun 2020 – Mar 2022

Raisa moved into a more administrative role within AstraZeneca. Where she handled and created batch-specific documentation. Updated and created Standard Operating Procedures for pharmaceutical manufacturing. Administrative work with filing and control of batch documentation.

Manufacturing Technician/Machine Operator

AstraZeneca AB | Sep 2006 – Maj 2020

Raisa worked extensively with updating and creating product process documentation (SOP standard operating procedure) after GMP and QA. Coordinated and investigated production deviations and complaints in cross-functional teams. The work as a manufacturing technician essentially involves monitoring one or

more machines that make different types of products. You can either operate the machines manually or by programming a computer which in turn controls the machines.

Previous Education

Bachelor of Science with a specialization in interaction design.

The main field of study: Informatics.

Linneaus University | 2017-2020

Economics and Leadership 60HP

University of Gävle | 2008–2009

Art and Design

Taljegymnasium | 2001–2004
